

Managing Domains

Once you have added a domain you can perform various actions on them, and with their corresponding top-level domains (TLDs) and secondary level domains (SLD). An SLD is the first part of the web address, such as **bestinsurance** in **www.bestinsurance.com** and a TLD is the last part of the web address after the dot, such as **.com**.

Access the Current Domains Page

1. [Access the Client Profile page.](#)
2. Select **Account Mgmt** and click **List Domains**. The *Current Domains* page appears.

On this page:

Filtering and Sorting Domains

You can customize the *All Domains* list by filtering and sorting your client's domains.

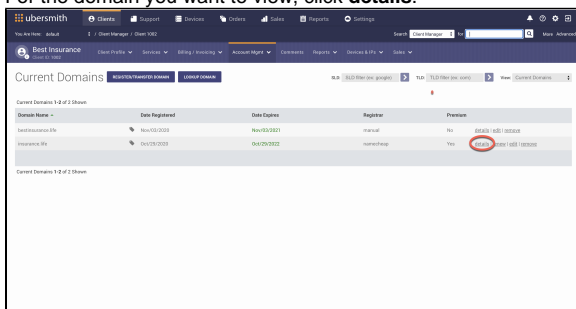

1. [Access the Current Domains page.](#)
2. In the **SLD** field, enter the secondary level domain (SLD) and click the **arrow**. The SLD is the first part of the web address, such as bestinsurance in [www.bestinsurance.com](#).
3. In the **TLD** field, enter the top level domain (TLD) and click the **arrow**. The TLD is the last part of the web address after the dot, such as .com
4. In the **View** field, select either **current domains**, **all domains**, **premium domains** or **expired domains**.

Viewing Domains

You can access a read-only view of your client's registered domains.

1. [Access the *Current Domains* page.](#)
2. For the domain you want to view, click **details**.

The *Domain Details* page appears.

3. Click **Cancel** to close the page.

ubersmith

Cancel

Renewing Domains

You can renew a registered domain that was added to the Current Domains page, except for ones that were manually added.

1. [Access the Current Domains page.](#)
2. For the domain you want to renew, click **renew**. The *Renew Domain* page appears.
3. In the **Number of Years** field, select the number of years to renew the domain.
4. In the **Auto-Renew** field, select Yes to have your domain service auto renew.
5. Select the **Premium Price to Confirm** field to acknowledge the domain name is considered premium by the registrar.
6. Click **Renew**.

ubersmith

Premium Price To Confirm (85.80): ☒ You are trying to process a premium domain. To proceed, confirm the Premium transaction price

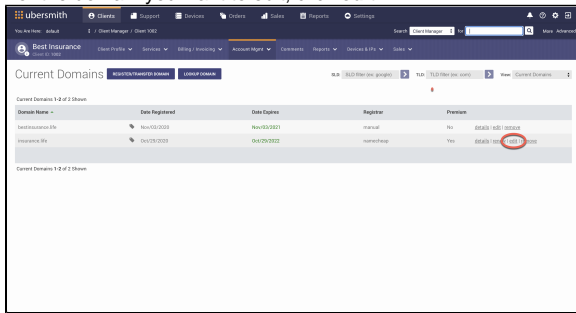

Renew Cancel

Editing Domains

Once a registered domain has been added to Ubersmith, you can update the service, registrar login credentials, active nameservers, and your client's registrant information.

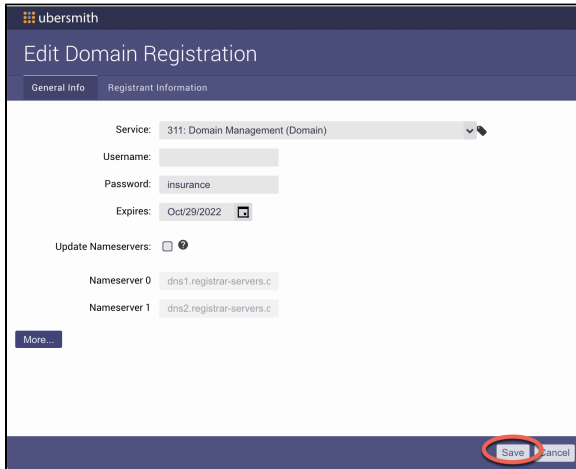

1. [Access the Current Domains page.](#)

2. For the domain you want to edit, click **edit**.

The *Edit Domain Registration* page appears.

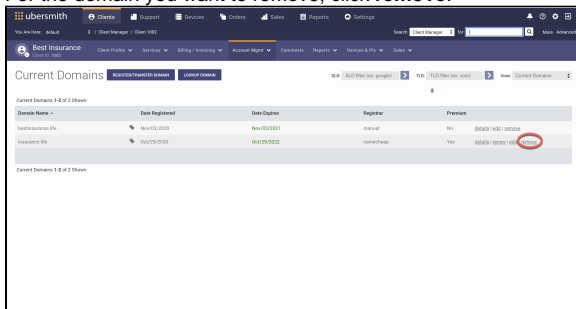

3. Make any necessary updates. Refer to [Adding](#), [Transferring](#) or [Registering Domain Names](#).
4. Click **Save**.

Removing Domains

Removing domains deletes the domain registration from Ubersmith but does not cancel the domain with that domain's registrar.

1. [Access the Current Domains page](#).
2. For the domain you want to remove, click **remove**.

A confirmation window appears.

3. Click **Yes**.
