

Adding Billing Agreements

Billing agreements allow you to establish recurring payments from a client without the need to store credit card data.

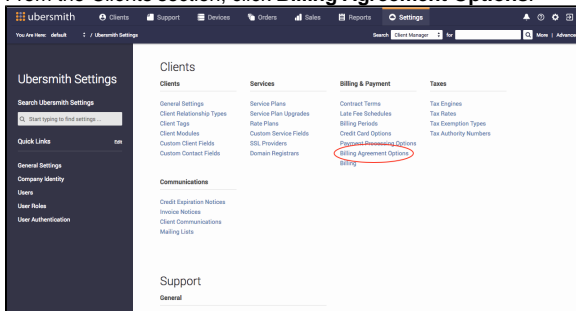

Access the Billing Agreement Options Page

1. From the *Ubersmith Dashboard*, click **Settings**.

The *Ubersmith Settings* page appears.

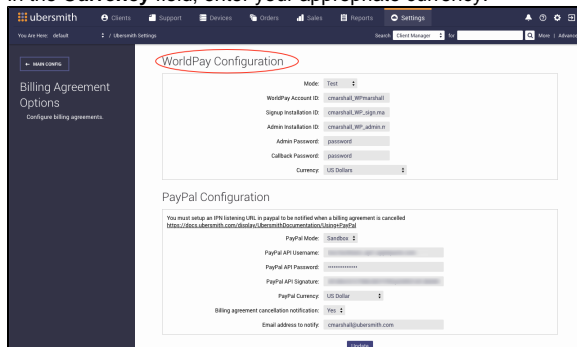

2. From the *Clients* section, click **Billing Agreement Options**.

The *Billing Agreement Options* page appears.

Configuring WorldPay

1. Access the *Billing Agreement Options* page.
2. Complete the *WorldPay Configuration* section.
 - In the **Mode** field, select **Live**.
 - In the **WorldPay Account ID** field, enter your WorldPay account ID.
 - In the **Signup Installation ID** field, enter your WorldPay signup installation ID.
 - In the **Admin Installation ID** field, enter your WorldPay admin installation ID.
 - In the **Admin Password** field, enter your WorldPay admin password.
 - In the **Callback Password** field, enter your WorldPay callback password.
 - In the **Currency** field, enter your appropriate currency.

Configuring PayPal

1. Access the *Billing Agreement Options* page.
2. Complete the *PayPal Configuration* section.
 - In the **PayPal Mode** field, select **Live**.
 - In the **PayPal API Username** field, enter your PayPal API user name.
 - In the **PayPal API Password** field, enter your PayPal API password.
 - In the **PayPal Signature** field, enter your PayPal API signature code.
 - In the **PayPal Currency** field, select your appropriate currency.

- In the **Billing agreement cancellation notification** field, select **Yes** to receive an email your client cancels their billing agreement in PayPal.
- In the Email address to notify field, enter the email address to receive the cancellation notification.

WorldPay Configuration
