2. In the **View** field, select **Active** to view all active order queues or select **Deactivated** to display all deactivated order queues.

## Activating Order Queues

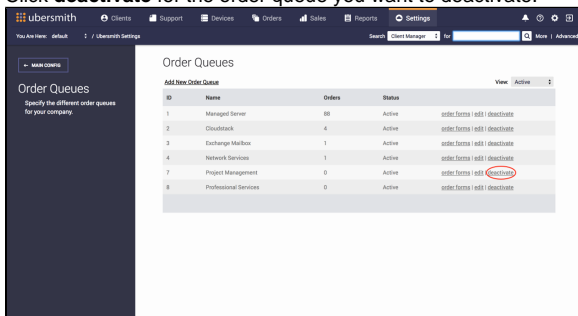

1. [Access the Order Queues page.](#)
2. In the **View** field, select **Deactivated**.
3. Click **activate** for the order queue you want to enable.

## Deactivating Order Queues

Deactivating an order queue removes it as a type of opportunity to select from the Sales Dashboard, if it was first configured to be allowed as a sales quote. Order in the queue remain there, and any incomplete orders will not be able to be processed.

1. [Access the Order Queues page.](#)
2. Click **deactivate** for the order queue you want to deactivate.

The *Manage Order Queue* page appears.
