

Configuring Payment Gateway Templates Plugin

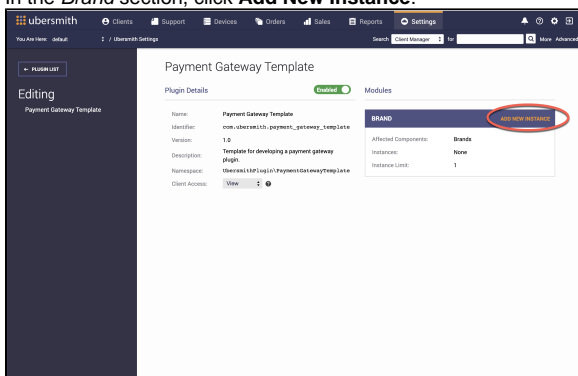

Ubersmith supports many payment gateways you can choose to work with, but if you have development resources, and would like to integrate with a gateway not already integrated within Ubersmith, you can use the Payment Gateway Template plugin. Use this plugin to add credit card, ACH, and IPN payment gateways not already supported by Ubersmith to one or more brands.

The configuration steps are as follows:

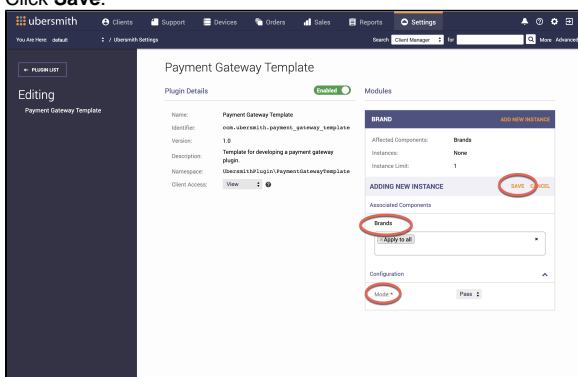

1. [Enable the Payment Gateway Template plugin.](#)
2. Configure the *Payment Gateway Template* plugin (below).
3. Configure the *Payment Processing Options* page (below).
4. [Develop a new Payment Gateway to be used by the plugin.](#)

Configuring the Payment Gateway Template Plugin

1. In the *Brand* section, click **Add New Instance**.

2. In the **Brands** field, select the brand you want to assign the payment gateway.
3. In the **Configuration** field, select **Pass**.
4. Click **Save**.

Configure the Payment Processing Options Page

Payment processing options define the specific payment gateways of your choosing to process payments. The following configurations select the payment gateway templates, so you can use a gateway not already available.

Complete the Credit Cards Section

1. [Access the Payment Processing Options page.](#)
2. In the **Credit Card Gateway** field, select **Payments Gateway Template**.
3. In the **Accept CVV2 Codes** field, select **Yes** to require the card's CVV2 code to process payments.

4. Click **Update**.

The screenshot shows the Ubersmith Settings page. The left sidebar has a 'SETTINGS' button and a 'Payment Processing Options' section with a sub-header 'Configure how you will receive payments from clients.' The main content area is titled 'Credit Cards' and has a red circle around it. Below this are sections for 'ACH Accounts', 'Payment Gateways', '2Checkout', 'Alipay', and 'Boletto'. Each section has a dropdown menu for 'Payment Gateway Template' and an 'Enable' checkbox.

Complete the ACH Accounts Section

1. [Access the *Payment Processing Options* page.](#)
2. In the **ACH Gateway** field, select **Payments Gateway Template**.
3. In the **Mode** file, select **Pass**.
4. Click **Update**.
