

Configuring Provision Zimbra Domain Order Module

When the module runs, an email domain for the client is created on your Zimbra mail server.

1. In the **Zimbra Host** field, enter your Zimbra host address.
2. In the **Zimbra Admin User** field, enter your Zimbra admin user name.
3. In the **Zimbra Admin Password** field, enter your Zimbra admin password.

The screenshot shows the 'Add Order Action' configuration page in the 'ubersmith' interface. The page has a dark blue header with the 'ubersmith' logo and title. Below the header, there are three tabs: 'Details', 'Prereqs', and 'Config', with 'Config' being the active tab. The main content area is white and contains three configuration fields: 'Zimbra Host' with the value 'officesolutions.com', 'Zimbra Admin User' with the value 'demoadmin', and 'Zimbra Admin Password' with a masked password '*****'. At the bottom of the page, there are three buttons: 'Save', 'Save & New', and 'Cancel'.
