

Configuring MaxMind minFraud Order Module

When the module runs, the address, phone, and IP used in the order are submitted to MaxMind minFraud (Link) to check if the contact details are legitimate or fraudulent.

1. In the **minFraud License Key** field, enter your MaxMind minFraud key.
2. In the **minFraud Request Type** field, select Free to use the free version, City to use the City version, and Premium to use the Premium version.
3. In the **min Fraud Version** field, select the version of the MaxMind minFraud to use.
4. In the **Fraud Score Limit** field, enter the numeral digit that halts an order based on meeting the fraud threshold.
