

# Deleting Support Tickets

Once you change a support ticket status to Deleted, it is sent to the Support Manager ticket trash bin and is deleted based on how the Auto-purge deleted tickets field is configured. If a client responds to a deleted ticket, it will change to the Open status. To completely remove the ticket, you will need to purge the ticket from Ubersmith.

1. [Access the \*Support Manager\*.](#)
2. [View the ticket.](#)
3. [Reply to a ticket](#) or [Quick edit a ticket](#) and in the **Change to** field, select **Deleted**.
4. [Access the \*Departments\* page.](#)
5. [Purge any deleted tickets from the \*Support Manager\*.](#)
