

Managing Order Forms

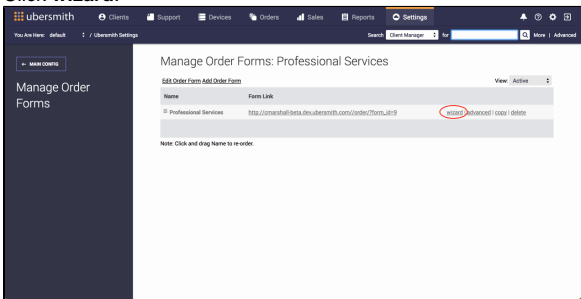

Once you have [added an order form](#), you can perform various actions.

Editing the Order Form with the Order Form Wizard

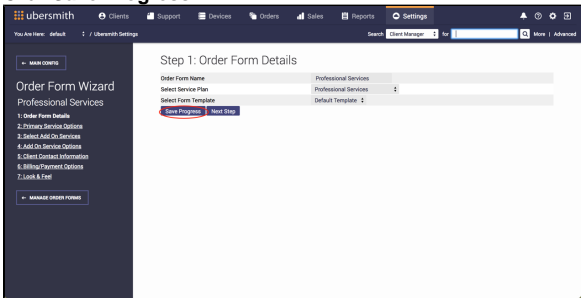

1. [Access the Order Queues page.](#)
2. Click **Order Forms**.

- The *Manage Order Forms* page appears.
3. Click **wizard**.

- The *Order Form Wizard* page appears.
4. Make any necessary updates you need.
 5. Click **Save Progress**.

Editing the Order Form with the Advanced Editor

The Advanced Editor provides greater control to the look and feel of the order form. Once an order form is generated using the Order Form Wizard, you can use the Advanced Editor to add, edit, remove, and rearrange any page or element. You can also add rules to individual elements, such as a required email format, and JavaScript.

Access the Advanced Editor

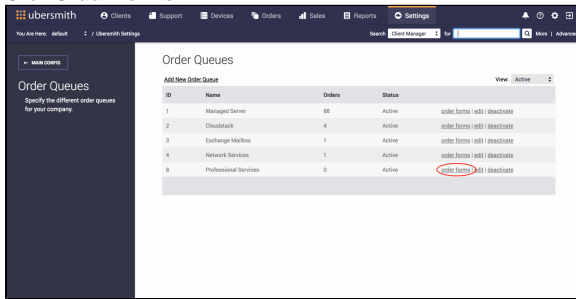

1. [Access the Order Queues page.](#)

On this page:

On this page:

2. Click **Order Forms**.

The **Manage Order Forms** page appears.

3. Click **advanced** for the order form you want to enhance.

Adding Pages

1. [Access the Advanced Editor](#).

2. Click **Add Page**.

The **Add Order Form Page** page appears.

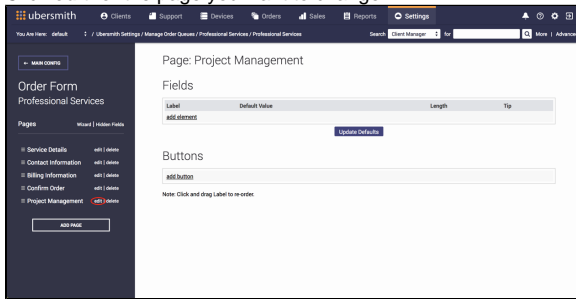

- In the **Page Name** field, enter the name of the order form page.
- In the **Template** field, select the appropriate template to use for the page.
- Optionally, you can add [elements](#), [buttons](#) and [JavaScript](#) to your page.
- Click **Save** or **Save & New**.

Editing Pages

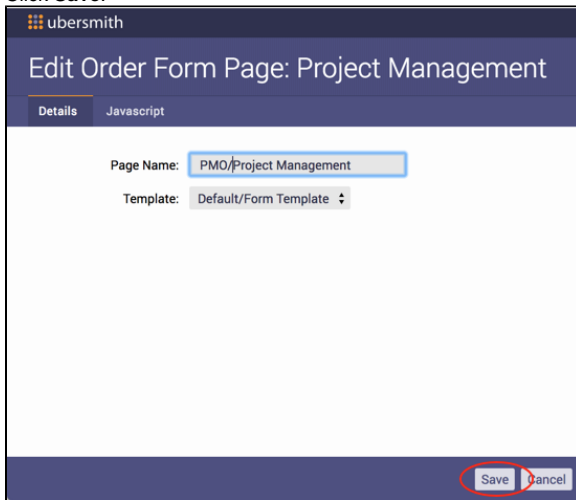

1. [Access the Advanced Editor](#).

2. Click **edit** for the page you want to change.

The *Edit Order Form Page* page appears.

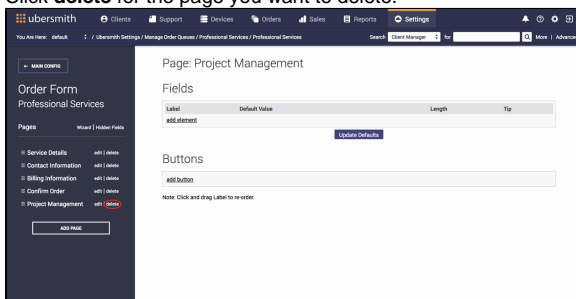

3. Make any necessary changes.
4. Click **Save**.

Deleting Pages

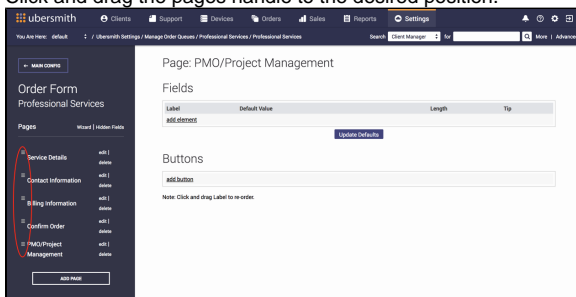

Deleting a page permanently removes it from the order form, along with all form elements that were included in it.

1. [Access the Advanced Editor.](#)
2. Click **delete** for the page you want to delete.

Rearranging Pages

1. [Access the Advanced Editor.](#)
2. Click and drag the pages handle to the desired position.

Adding Elements

Once the order form pages are defined, form elements need to be added, including all fields that the client will be expected to input, hidden fields, and any static text or HTML that should be displayed as part of the page.

1. [Access the Advanced Editor.](#)
2. Click the page you want to add elements to.

The selected page appears.

3. Click **add element**.

The Add Order Form Element page appears.

Complete the Element Details Tab

1. In the **Element Type** field, select the type of field.
2. In the **Field Name** field, enter the name of the field.
3. In the **Label** field, enter the text to display on the order form.
4. In the **Constant** field, select **Yes** if you want your client to be able to change the input value.
5. In the **Page** field, select the order form page the field belongs on.

Complete the Extra Attributes Tab

1. Click the *Extra Attributes* tab.
2. In the **Attributes** field, enter HTML or JavaScript to further define the element.

3. In the **Tooltip** field, enter the text that appears when a client hovers their mouse over the field.

IP Address			add edit delete

The selected page appears.

- Click and drag that element or button handle to the desired position.

Adding JavaScript

These are optional fields to add any custom JavaScript to a page. See the [JavaScript](#) site for more information.

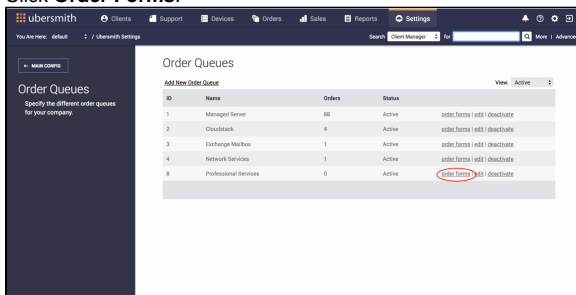

- Access the [Advanced Editor](#).
- Create or access the page you want to add JavaScript to.
- Click the [JavaScript](#) tab.
- In the **JavaScript** field, enter any JavaScript to be used at the top of the page, such as defining any functions called by elements within the page.
- In the **onLoad JavaScript** field, enter any JavaScript to run when the page is loaded.

Copying Order Forms

Copying an order form makes a duplicate copy of a form, so you can use the same layout for a different plan without having to start from scratch.

- Access the [Order Queues](#) page.
- Click **Order Forms**.

The *Manage Order Forms* page appears.

3. Click **copy**.

The *Copy Order Form* page appears.

4. In the **Form Name** field, enter the name for the new form.
5. In the **Order Queue** field, select the order queue the new order form belongs to.
6. Click **Copy**.

Deleting Order Forms

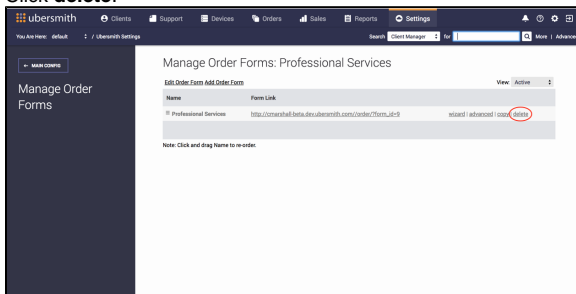

Deleting an order form is permanent, and remove the ability for your clients to order it.

1. [Access the Order Queues page.](#)
2. Click **Order Forms**.

The *Manage Order Forms* page appears.

3. Click **delete**.
