

Hiding Customer Information within RWhois

You can hide your clients' personal data found in RWhois by [creating a custom client group and field](#). The RWhois output will be replaced with either Private Customer or Private Residence depending on the option chosen.

1. [Access the Custom Client Fields page](#).
2. [Create a custom field group for RWhois](#).
3. [Create a custom field](#) with the following configuration:
 - a. In the **Label** field, enter **hide_address_in_whois**.
 - b. In the **Type** field, select **Select box**.
 - c. In the values field, input:
 - i. **0:Display Full Details**
 - ii. **1:Hide All Details**
 - iii. **2:ARIN Customer Privacy Guidelines**
 - d. In the **Default Value** field, enter the option number (0, 1, or 2) you want to display as default. This field is a numeric entry, but displays the text located after the colon.
 - e. Click **Save**.
