

Managing Device Group and Device Type Modules

Once you have [created a device group or device type module](#), you can perform various actions on it. Ubersmith also allows you to plug in your own device modules. Examples are available at [Ubersmith Device Module Examples](#).

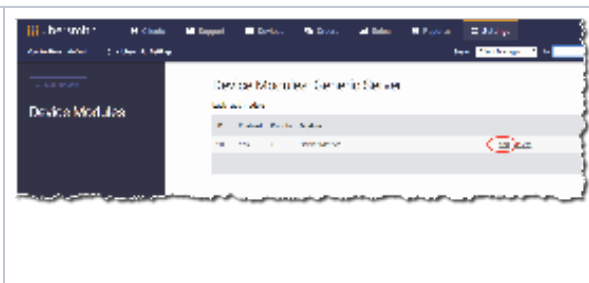

Editing Device Group and Device Type Modules

1. [Access The Device Types page](#).
2. Click **modules** in a device group or device type row of the device type group or device type for which you want to add a module.

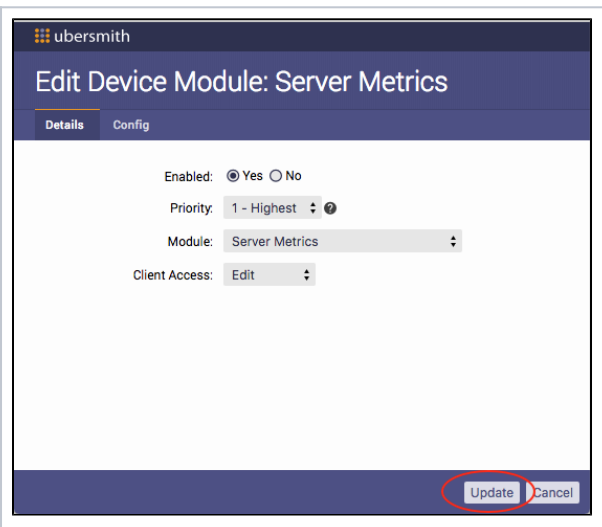

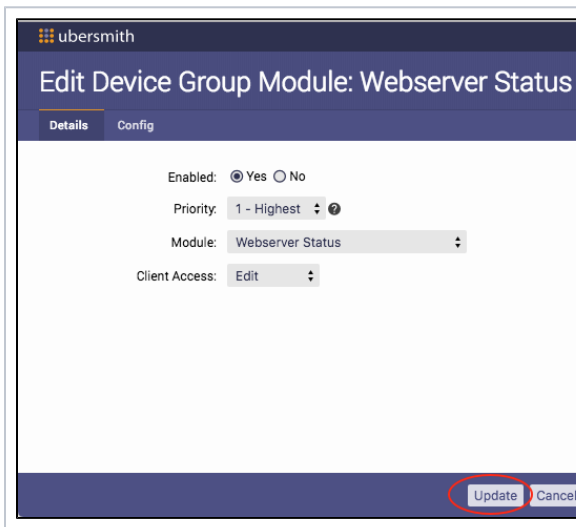

The *Device Group Modules* or *Device Modules* page appears.

3. Click **edit** in the module row you wish to change.

The *Edit Device Group Module* or *Edit Device Module* page appears.

4. From the *Edit Device Group Module* or *Edit Device Module* page, make any necessary updates you need.
5. Click **Update**.

Deleting Device Group and Device Type Modules

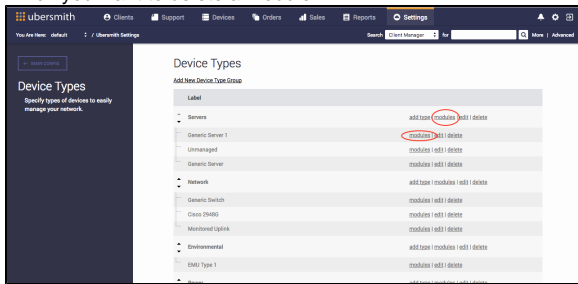

1. [Access The Device Types page](#).
