

Managing the Plugin Logger

Once you have enabled the *Plugin Logger*, you can view its results and filter the content.

Viewing the Plugin Logger

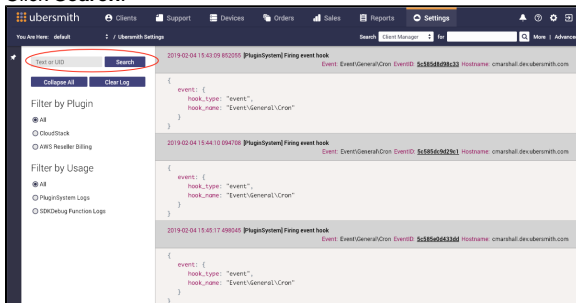

1. Access the *Plugins* page.
2. Click **Go to Logger**.

The *Plugin Logger* appears.

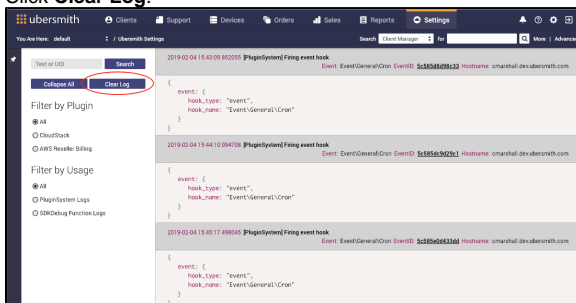

Searching the Plugin Logger

1. Access the *Plugin Logger*.
2. In the **Text** or **UID** field, enter the criteria you need to find.
3. Click **Search**.

Clearing the Plugin Logger

1. Access the *Plugin Logger*.
2. Click **Clear Log**.

Filter the Plugin Logger

You can filter login information by a specific enabled and configured plugin or by usage.

Filtering by Plugin

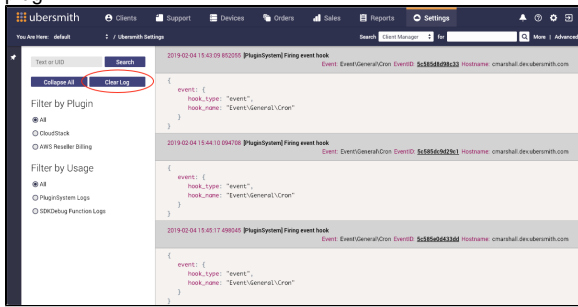

1. Access the *Plugin Logger*.

On this page:

On this page:

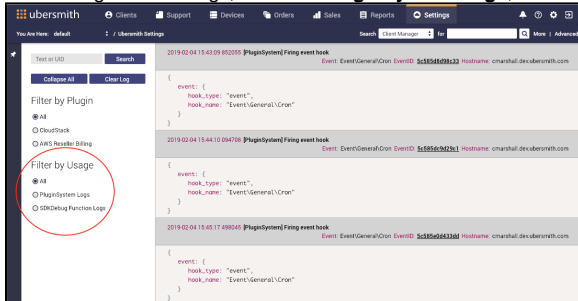

- [Viewing the Plugin Logger](#)
- [Searching the Plugin Logger](#)
- [Clearing the Plugin Logger](#)
- [Filter the Plugin Logger](#)
 - [Filtering by Plugin](#)
 - [Filtering by Usage](#)
- [Related Topics](#)

2. In the *Filter by Plugin* section, select **All** to view log entries for all plugins, or select an individual plugin.

Filtering by Usage

1. [Access the Plugin Logger.](#)
2. In the *Filter by Usage* section, select **All** to view log entries for both PluginSystem logs and SDKDebug Function logs, or select **PluginSystem Logs**, or **SDKDebug Function Logs**.
