

Configuring Plugin Settings

The *Plugin Logger* tracks what PluginSystem hooks are being fired and how your plugins are reacting to them. For more information on how the logger functions, see [Creating Plugins](#).

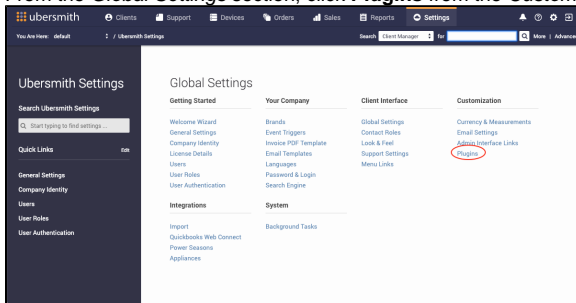

Access the Plugin Settings Page

1. From the *Ubersmith Dashboard*, click **Settings**.

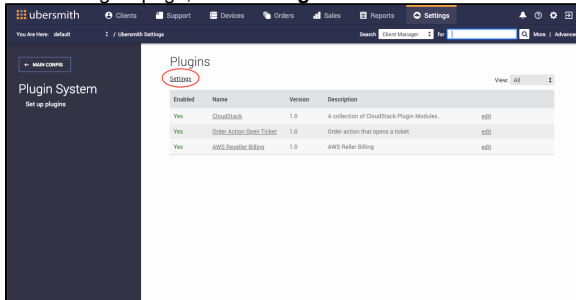

The *Ubersmith Settings* page appears.

2. From the *Global Settings* section, click **Plugins** from the *Customization* column.

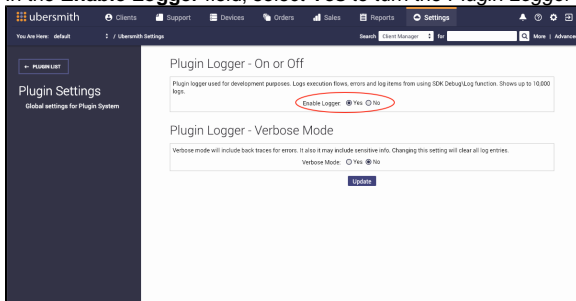

The *Plugins* page appears.

3. On the *Plugins* page, click **Settings**.

Complete the Plugin Logger – On or Off Section

- In the **Enable Logger** field, select **Yes** to turn the *Plugin Logger* on.

Complete the Plugin Logger – Verbose Mode Section

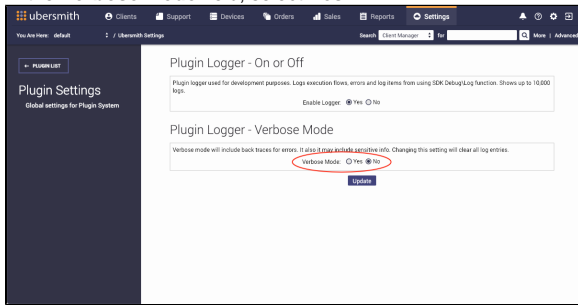

If you enable the verbose mode, all previous log entries will be removed.

On this page:

On this page:

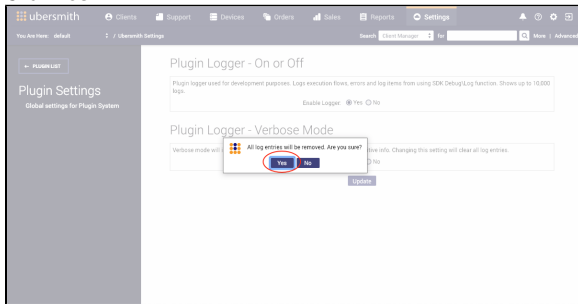

- [Access the Plugin Settings Page](#)
