

Configuring Provision CloudStack Account Order Module

When the module runs, a CloudStack account is created for the client on your configured CloudStack server.

Note

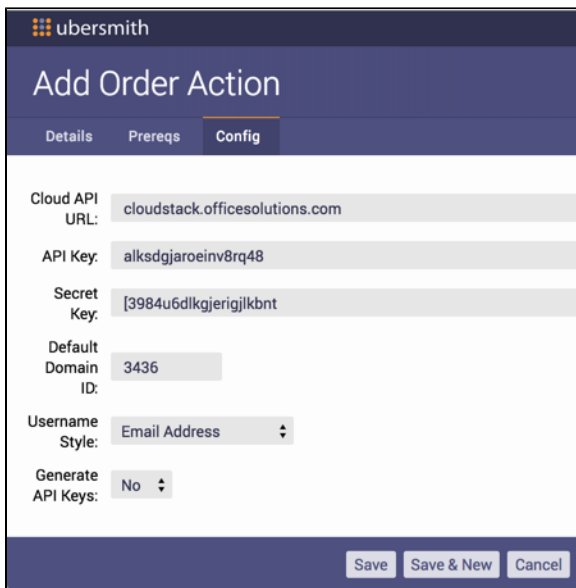

Your client will also need to setup a CloudStack account.

1. In the **Cloud API URL** field, enter your CloudStack URL.
2. In the **API Key** field, enter your CloudStack API key.
3. In the **Secret Key** field, enter your CloudStack secret key.
4. In the **Default Domain ID** field, enter your domain ID.
5. In the **Username Style** field, select **Email Address** to set the user name format to an email address or **Ubersmith Username** to set the format to the same Ubersmith user name.
6. In the **Generate API Keys** field, select **Yes** to generate the user's API key or select **No**.

The screenshot shows the 'Add Order Action' configuration form in the Ubersmith application. The form has three tabs: 'Details', 'Prereqs', and 'Config', with 'Config' currently selected. The form contains the following fields:

- Cloud API URL:** cloudstack.officesolutions.com
- API Key:** alksgdjaroenv8rq48
- Secret Key:** [3984u6dlkgjerig]lkbnt
- Default Domain ID:** 3436
- Username Style:** Email Address (selected from a dropdown menu)
- Generate API Keys:** No (selected from a dropdown menu)

At the bottom of the form, there are three buttons: 'Save', 'Save & New', and 'Cancel'.
