

Configuring Activate Services Order Module

When the module runs, it sets any service that has been added to active.

1. In the **Align Services Date** field, select **Yes** to automatically prorate the service's first renewal to the default renewal date set in the client's account.
2. In the **Align Billing Start Date** and **Current Renewal Period**, select **Yes** to set the start, activation and last renewal dates on the service to the current date and the renewal date to the day one period from now. This will update the service to start from this moment.

The screenshot shows the 'Add Order Action' configuration page in the 'ubersmith' interface. The page has a dark blue header with the 'ubersmith' logo and title. Below the header is a tabbed interface with three tabs: 'Details', 'Prereqs', and 'Config'. The 'Config' tab is currently selected. The main content area of the 'Config' tab contains two configuration options, each with a 'Yes' dropdown menu: 'Align Service Dates:' and 'Align Billing Start Date and Current Renewal Period:'. At the bottom of the page, there are three buttons: 'Save', 'Save & New', and 'Cancel'.
