

# Configuring Simple Question Order Module

When the module runs, the order halts until the user appropriately answers predefined questions.

1. In the **Question to be answered by the admin** field, enter the question.
2. In the **Accepted Answers** field, enter the acceptable answers, one per line.
3. In the **Unaccepted Answers** field, enter the unacceptable answers, one per line.
4. Select the **Bypass for Existing Clients** field, to skip this question when the customer is already established.
