

Configuring Create Pardot Prospect Order Module

When the module runs, a sales prospect in a third-party [Pardot system](#) is created using the client's basic contact information, such as email, first, last, and company name.

1. In the **Pardot Username** field, enter your Pardot username.
2. In the **Pardot Password** field, enter you Pardot password.
3. In the **Pardot Userkey** field, enter you Pardot user key.
4. In the **Bypass for Existing Clients** field, select if you want to skip this order action for your existing clients and only run it for new clients.
